

COMMUNITY HEALTH SERIES

THE CHILDHOOD OBESITY EPIDEMIC

Can we stop it?

Be part of this informative session on a national epidemic: CHILDHOOD OBESITY. We may be raising the first generation in our history destined to have shorter life-spans than their parents. Diabetes, cardiac problems, high cholesterol, and other conditions once found almost exclusively in middle age and older patients are being diagnosed in children and teens.

Join us for this interesting take on childhood obesity from family physician Mary Siciliano, DO, Coventry Medical Center and our Registered Dietitian Kathy Decker, who is certified in childhood obesity and nutrition. **Learn how to get your whole family on track to healthier eating** and find out about our upcoming series for parents and kids.

A healthy dinner will be served.

Wednesday, October 12th ~ 6:30 pm
Farley Education Center

FREE. *Advance registration is required.*
