Mansfield Elementary Science Fair!

January 21, 2010

Hello!

I hope the New Year finds you all well and feeling a bit creative because it's time to start planning for the Science Fair!

The Science Fair is an exhibition that provides a chance for students to display scientific experiments that they have created. The purpose is to help students find out more about a specific topic using the scientific method. Projects do not need to be difficult or complex; rather, students should select a topic that they like, have the skills to do, and can easily understand and explain.

The Science Fair is open to all kindergarten – 6th grade students and will be held on **Thursday, March 18** in the evening, for one evening only. Projects may be done as an individual, with a partner, or as a family. I am hoping the latter is most appealing to you. This is a great family activity!

On the back of this page you will find the rules for the Science Fair along with some websites that may be helpful.

Please return the Science Fair Reservation to me by February 4, 2010, in order to reserve a space for your project. If additional forms are needed for siblings, please see the "Science Fair" link on the school's website: www.mansfielelementary.org, or contact Mrs. Mattison at mattisonk@mansfielelementary.org.

Good luck with your project!

Mrs. Mattison

Science Coordinator

Science Fair Rules

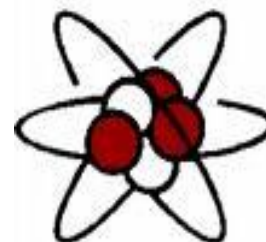

1. No fire, weapons, glass, or animals permitted.
2. Projects must be safe.
3. Students must stay with their project and be able to explain and or demonstrate it to visitors.
4. Name must be displayed on or with the project.
5. Project needs to be sturdy enough to be touched by others, or place a "Do Not Touch" sign on it if you do not want it touched.
6. Doors open at 6:00 PM on Thursday, March 18 for set-up. Science Fair is open to the public from 6:30-8:00 PM.
7. Clean up and take all projects home at 8:00 PM.
